Amendments to the Specification:

1.   Please replace paragraph **[0021]** with the following amended paragraph **[0021]**:

[0021]   FIG. 2 illustrates that the core wireless engine 60 is attachable to a variety of different host interfaces. In this example, host interfaces for IEEE 1394, a Peripheral Component Interconnect (PCI), CardBus, Universal Serial Port (USB), CardBay, Personal Computer Memory Card International Association (PCMCIA) standards re-are shown. Since a standardized CWE interface is used, this allows the host interfaces to be designed to interface with the same standardized CWE interface.
